

Ultra Flexible Memory Wire Antenna

AFNT-H7

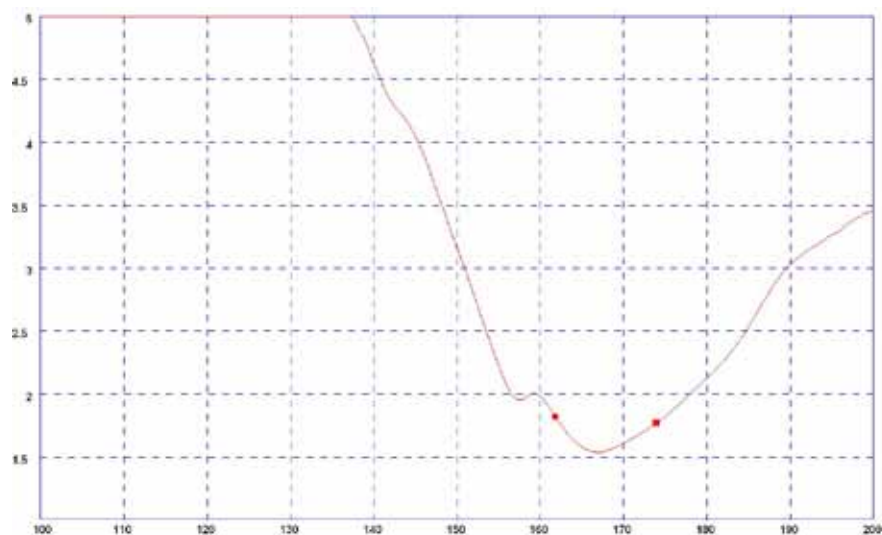

16/08/2011 v2

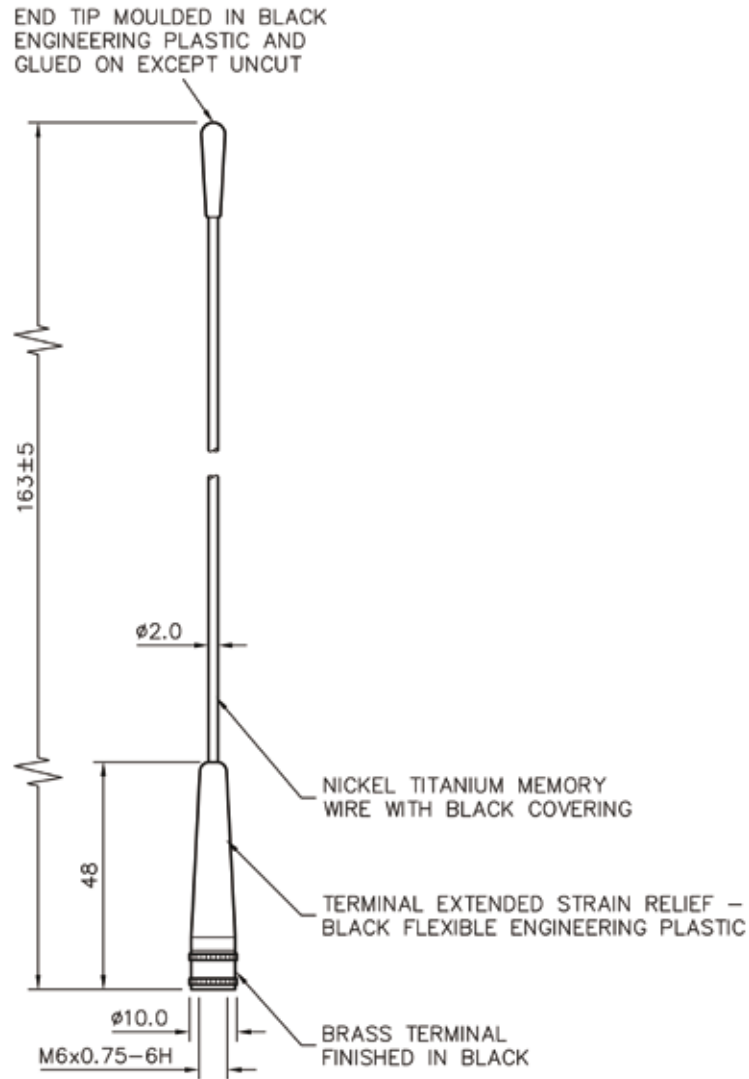

- Excellent performance
- Ultra Flexible Memory Whip
- Single hole fixing

The AFNT is a highly durable, flexible VHF whip. With a nickel titanium core the AFNT is overmoulded with nylon to produce a high quality signal wherever you are. With a range of mounting bases available, installation is simple, involving only one hole to minimize vehicle holes.

Typical VSWR

Part No.

AFNT - H7

Electrical Data

Frequency Range (MHz)	162 - 174
Operational Band	H7
Gain: Isotropic	2dBi
Compared to ¼ wave	0dB
Impedance	50Ω

Mechanical Data

Dimensions (mm)	Whip Length	163
Operating Temp (°C)		-40° / +80°C (-40° / 176°F)
Material		High Impact U.V. Stable A.B.S
Colour		Black

Mounting Data

Fixing	Panel mount
Hole Size (mm)	10 (.39")
